What are Makino Tomatoes?

Producer
Mr. Seiki Makino
Toyohashi City,
Aichi Prefecture

Makino tomatoes are low in acidity and high in natural sugars, offering a fruit-like sweetness reminiscent of Shine Muscat grapes. Their rich, intense sweetness makes them popular even among those who don't usually enjoy tomatoes.

“Edamame in season”

Limited Time

Edamame

The edamame season is very short, and both the best time and place to grow them change over time. At Kirin City, we source edamame that are in season right now from all over Japan, and serve freshly boiled ones once we receive an order. We have a wide variety of edamame available from early summer to autumn. Please enjoy them with your favorite beer!
