# 北海道フェア おすすめ素材

All ingredients are from Hokkaido!

## Giant Pacific octopus

We immediately process giant Pacific octopus caught in the Sea of Okhotsk and off the coast of eastern Hokkaido to deliver it to you with the same level of freshness. Defined by its sweetness and umami that unfold with every bite.

## Scallops

We carefully process fresh scallops from Funka Bay in Hokkaido one by one, paying close attention to the condition of each of them. Savor the scallops' natural umami and sweetness to the fullest.

## Hokkaido cream cheese

Made with fresh milk from Hokkaido's Konsen region, which is known for its cool climate and abundant nature, this cream cheese offers a gentle milky flavor, a mellow saltiness, and a smooth, creamy texture.

## Hokkaido Potatoes (Poroshiri)

"Poroshiri," which gets its moniker from the mountain of the same name in the Hidaka Mountains of Hokkaido, literally means "big mountain" in Ainu. As this suggests, these potatoes are produced with the hope that they will grow large.

## Salmon Toba

"Salmon Toba" is a traditional Hokkaido food originally created as a preserved food to get through the winter. Made with 100% Hokkaido-sourced fall salmon, it has a soft exterior and a moist, juicy interior. Savor the rich umami and natural sweetness that unfold with every bite.

Some menu items may sell out quickly, depending on availability of ingredients.
